

History and Physical:

Historical Findings	Physical Findings
<ul style="list-style-type: none">▪ Determine type of exposure and refer to the USDOT-ERG for initial assessment and management	<ul style="list-style-type: none">▪ Finding will vary based upon contaminant▪ If Organophosphates (OGPs)<ul style="list-style-type: none">○ SLUDGE-BM<ul style="list-style-type: none">- Salivation, Lacrimation (tearing), Urination, Diarrhea/Defecation, GI distress, Emesis, Bradycardia and Miosis (pinpoint pupils)

Assessment:

- Medical care should be coordinated with a Hazardous Materials Response Team
- Ensure that the patient has been decontaminated
- At **NO TIME** should First Responders enter the **HOT** or **WARM** Zone, unless wearing appropriate PPE
 - First Responders should follow the operating procedures for their department for Haz-Mat Response
- If exposure is localized and not generalized:
 - Dry chemical: brush the chemical off and flush with copious amounts of water.
 - Wet Chemical: Irrigate with copious amounts of waterWater should be from a steady stream for last least 15-20 minutes into a sanitary sewer

Clinical Management Options:

Interventions	
<ul style="list-style-type: none">▪ Assure scene and personal safety▪ Assure that patient has been decontaminated appropriately▪ Provided for oxygenation and ensure patent airway
